Depositing Research Manuscripts With an Approved Public Repository

All *Archives* Journal articles reporting original research are made freely available 12 months after publication, from 1998 forward, subject to certain conditions. The *Archives* Journals' Editors and Publishers believe that the public is best served by accessing the freely available research articles on the journal site, to ensure access to the final published version, any corrections, and related Web features. However, some funding organizations require that authors of manuscripts reporting research deposit those manuscripts with an approved public repository, such as PubMed Central. Authors have the *Archives* Journals' permission on the following conditions:

1. Permission is granted only for manuscripts reporting research funded by not-for-profit organizations to be deposited in not-for-profit, publicly available repositories.
2. Permission is granted to post only the manuscript reporting research that was submitted and accepted for publication but not the final, edited, formatted, and published article.
3. Authors must ensure that the posted manuscript links back to the published article on the *Archives* Journals Web site to provide readers with access to the final reviewed and edited version plus any corrections and letters, as well as the article-related features only available on the *Archives* Journals Web site.
4. Authors who submit their manuscripts to an approved public repository, such as PubMed Central, must indicate that the manuscript may not be made available to the public sooner than 12 months after publication in the *Archives* Journals.

If authors adhere to these requirements, they may submit the final accepted version of the manuscript to the repository, if and only if the repository ensures that the deposited manuscript will not be made available to the public during the 12-month embargo following publication in the *Archives* Journals.

Behavioral and Brain Sciences

No information.

Cerebral Cortex

http://www.oxfordjournals.org/access_purchase/self-archiving_policyb.html

Authors may upload their accepted manuscript PDF ("a post-print*") to institutional and/or centrally organized repositories (including PubMed Central), but must stipulate that public

Information current as of 18 March 2008. Please verify policies as noted with the publisher or check http://publicaccess.nih.gov/submit_process_journals.htm

availability be delayed until **12 months after first online publication** in the journal. Please note that a special policy applies for articles published under the *Oxford Open* initiative - see below.

For NIH grantees: Publishing in this journal is fully compliant with the National Institute of Health (NIH) Public Access policy (<http://www.nih.gov/about/publicaccess>).

When uploading an accepted manuscript to a repository, authors should include a credit line (see below) and a link to the final published version of the article. This will guarantee that the definitive version is readily available to those accessing your article from public repositories, and means that your article is more likely to be cited correctly.

A PDF of the final published version of the article as it appears in the journal following copyediting and proof correction **may not** be deposited by authors in institutional repositories unless the article is published under the *Oxford Open* initiative - see below.

Authors should include the following credit line when depositing their accepted manuscripts:

This is a pre-copy-editing, author-produced PDF of an article accepted for publication in [insert journal title] following peer review. The definitive publisher-authenticated version [insert complete citation information here] is available online at: xxxxxx [insert URL that the author will receive upon publication here].

* Definition of a post-print: A post-print is the final draft author manuscript, as accepted for publication, including modifications based on referees' suggestions but before it has undergone copyediting and proof correction.

Child Development

No information.

Experimental Aging Research

<http://www.tandf.co.uk/journals/authorrights.pdf>

No information. Copyright Form not clear.

Journal of Cognitive Neuroscience

No information.

Journal of Experimental Analysis of Behavior

http://publicaccess.nih.gov/submit_process_journals.htm

If you publish in this journal, no further action is needed to comply with the submission requirement of NIH Public Access Policy.

Journal of Experimental Child Psychology

<http://www.elsevier.com/wps/find/authorsview.authors/nihauthorrequest>

Elsevier will send the original version of the author's manuscript, which was accepted and sent to our production department and reflects any author-agreed changes made in response to peer-review comments. Elsevier will authorize its public access posting 12 months after final publication. Please note the final published version is not posted on PubMed Central.

Journal of Experimental Psychology, Learning, Memory and Cognition

<http://www.apa.org/journals/authors/pubmed-deposit.html>

APA will deposit appropriate manuscripts on behalf of the authors. Authors publishing in APA or EPF journals, who wish to voluntarily deposit their manuscript in PMC, should NOT personally and directly deposit Word documents of APA published articles in PMC. As the copyright holder, APA will deposit the final accepted manuscript 11 1/2 months after the publication date of the article for manuscript appropriate for such deposit, upon request by the author. [Complete and submit a PMC depositing request to APA Journals](#) (PDF: 30KB).

Journal of Experimental Psychology - General

<http://www.apa.org/journals/authors/pubmed-deposit.html>

APA will deposit appropriate manuscripts on behalf of the authors. Authors publishing in APA or EPF journals, who wish to voluntarily deposit their manuscript in PMC, should NOT personally and directly deposit Word documents of APA published articles in PMC. As the copyright holder, APA will deposit the final accepted manuscript 11 1/2 months after the publication date of the article for manuscript appropriate for such deposit, upon request by the author. [Complete and submit a PMC depositing request to APA Journals](#) (PDF: 30KB).

Journal of Experimental Psychology - Human Perception and Performance

<http://www.apa.org/journals/authors/pubmed-deposit.html>

APA will deposit appropriate manuscripts on behalf of the authors. Authors publishing in APA or EPF journals, who wish to voluntarily deposit their manuscript in PMC, should NOT personally and directly deposit Word documents of APA published articles in PMC. As the copyright holder, APA will deposit the final accepted manuscript 11 1/2 months after the publication date of the article for manuscript appropriate for such deposit, upon request by the author. [Complete and submit a PMC depositing request to APA Journals](#) (PDF: 30KB).

Journals of Gerontology - Psychological Sciences

No information.

Journals of Gerontology - Social Sciences

Journal of the History of Neurosciences

<http://www.tandf.co.uk/journals/authorrighths.pdf>

No information. Copyright Form not clear.

Journal of Memory and Language

<http://www.elsevier.com/wps/find/authorsview.authors/nihauthorrequest>

Elsevier will send the original version of the author's manuscript, which was accepted and sent to our production department and reflects any author-agreed changes made in response to peer-review comments. Elsevier will authorize its public access posting 12 months after final publication. Please note the final published version is not posted on PubMed Central.

Journal of Neuroscience

<http://www.jneurosci.org/misc/Copyright-Form.pdf>

The Author shall have the right to release the information and deposit the accepted manuscript in any required or requested depository, as indicated by government funding agencies, provided access to the manuscript is granted 6 months after the manuscript has been published in *The Journal of Neuroscience*.

<http://www.jneurosci.org/misc/ifacomply.shtml>

Journal authors are required to insert the following phrase on the title page of the manuscript before it is uploaded to PMC: "This article is an un-copied author manuscript that has been accepted for publication in *The Journal of Neuroscience*, copyright 200_ Society for Neuroscience. The Society for Neuroscience disclaims any responsibility or liability for errors or omissions in this version of the manuscript or any version derived from it by NIH or other parties." The PMC entry will include a link back to the author's final publication in *The Journal of Neuroscience*, which is the version of record. The intent is to make clear to the reader that the PMC manuscript is not the final version of your article. By directing readers to the article of record, we hope to ensure accurate (and accurately counted) citations to your paper.

Neuroimage

<http://www.elsevier.com/wps/find/authorsview.authors/nihauthorrequest>

Elsevier will send the original version of the author's manuscript, which was accepted and sent to our production department and reflects any author-agreed changes made in response to peer-review comments. Elsevier will authorize its public access posting 12 months after final publication. Please note the final published version is not posted on PubMed Central.

Neuron

<http://www.cellpress.com/misc/page?page=nihpage>

Cell Press facilitates author posting in connection with the voluntary posting request of the NIH (referred to as the NIH "Public Access Policy," see <http://publicaccess.nih.gov/>) by

Information current as of 18 March 2008. Please verify policies as noted with the publisher or check http://publicaccess.nih.gov/submit_process_journals.htm

submitting the peer-reviewed author's manuscript directly to PubMed Central (PMC). This policy went into effect for papers accepted for publication after May 2nd, 2005. Our original policy required authors to send an email request before the paper would be submitted to PMC. In July 2006, Elsevier agreed with NIH to directly deposit all NIH-funded articles unless the authors specifically request otherwise.

Authors who have been accepted for publication in a Cell Press journal will be asked in the new form of the author agreement whether the underlying research reported in their papers was funded by the NIH. If the returned form indicates that the research is funded by NIH, we will send to PMC the version of the author's manuscript that reflects any author-agreed changes made in response to peer-review comments, and authorize its public access posting 12 months after final publication

Neuropsychology

<http://www.apa.org/journals/authors/pubmed-deposit.html>

APA will deposit appropriate manuscripts on behalf of the authors. Authors publishing in APA or EPF journals, who wish to voluntarily deposit their manuscript in PMC, should NOT personally and directly deposit Word documents of APA published articles in PMC. As the copyright holder, APA will deposit the final accepted manuscript 11 1/2 months after the publication date of the article for manuscript appropriate for such deposit, upon request by the author. [Complete and submit a PMC depositing request to APA Journals](#) (PDF: 30KB).

Perception and Psychophysics

No information.

Physiology and Behavior

<http://www.elsevier.com/wps/find/authorsview.authors/nihauthorrequest>

Elsevier will send the original version of the author's manuscript, which was accepted and sent to our production department and reflects any author-agreed changes made in response to peer-review comments. Elsevier will authorize its public access posting 12 months after final publication. Please note the final published version is not posted on PubMed Central.

PNAS

http://publicaccess.nih.gov/submit_process_journals.htm

If you publish in this journal, no further action is needed to comply with the submission requirement of NIH Public Access Policy.

Psychological Science

<http://www.blackwellpublishing.com/static/selfarchive.asp>

Not clear - depends on definition of "free public server your subject area."

Psychology and Aging

<http://www.apa.org/journals/authors/pubmed-deposit.html>

APA will deposit appropriate manuscripts on behalf of the authors. Authors publishing in APA or EPF journals, who wish to voluntarily deposit their manuscript in PMC, should NOT personally and directly deposit Word documents of APA published articles in PMC. As the copyright holder, APA will deposit the final accepted manuscript 11 1/2 months after the publication date of the article for manuscript appropriate for such deposit, upon request by the author. [Complete and submit a PMC depositing request to APA Journals](#) (PDF: 30KB).

Psychonomic Bulletin and Review

No information.

Science

<http://www.sciencemag.org/help/authors/pmc.dtl>

For research papers created under grants awarded no earlier than 2 May 2005, and for which the authors are required by their funding agencies to make their research results publicly available, authors may implement posting to the funding body's archive or designated repository, no sooner than six months after final publication, of the "accepted version" of the paper, provided the posting is linked back to the original *Science* version and includes the published paper's full reference citation. The "accepted version" is the version of the paper accepted for publication in *Science* after changes resulting from peer review, but before *Science*'s editing, image quality control, and production. This policy does not apply to editorials, reviews, or commentary pieces. In submitting to archives such as PMC, authors of *Science* papers should set the time of public release of the accepted version at six months after final publication in *Science*.
