Enabling Cookies for the Survey

This document will provide instruction for enabling cookies in the following browsers:

- Apple Safari
- Google Chrome
- Microsoft Internet Explorer (Versions 7 and 8)
- Mozilla Firefox

Apple Safari

- Select “Preferences” from the Edit menu.
• Click the lock icon labeled “Security.”
• The setting in the “Accept Cookies” section is set to “Only from sites I visit” by default. This is fine so long as you visit http://becker.wustl.edu before navigating to our other resources, such as the library catalog, which exist on different domains (the catalog is http://beckercat.wustl.edu).
• If in doubt, set accept cookies to “Always” and remember to change back to the default setting when finished using Becker resources.
Google Chrome

- Click the wrench icon on the far right and select “Options.”
• In the left column, select “Under the Hood” and click the “Content Settings” button.
• On the Content Settings page there is a section titled “Cookies.” The top default choice will allow cookies.
• If you prefer to have more granular control over which sites are allowed to set cookies, click the “Manage Exceptions” button at the bottom of the cookies section.
• In the next page that appears, add “becker.wustl.edu” to the exceptions list with an “Allow” behavior.
Microsoft Internet Explorer (Versions 7 and 8)

- Select “Internet Options” from the Tools menu.
• Click the “Privacy” tab at the top of the Internet Options box.
• The default setting is “Medium High,” which should allow cookies to be set.
• If you prefer to run a higher privacy setting level, or prefer to have more control over which sites are allowed to set cookies, click the “Sites” button.
• For the survey, add “becker.wustl.edu” to the allow list
Mozilla Firefox

Depending on whether the menu bar is enabled, the “Options” menu can be found one of two ways.

- Click the orange Firefox button at the top left and select “Options”
- Click “Tools” and select “Options” from the drop down menu.
• Select the mask icon labeled “Privacy.”
• In the History section below where it says “Firefox will:” followed by a drop down menu, make sure “Remember history” or “Use custom settings for history” is selected.
• If you choose “Use custom settings for history,” click the “Exceptions” button and add “becker.wustl.edu” with the “Allow” or “Allow for Session” behavior.
